

# Nonfunctional requirements

## I. Security

- The platform should lock an account after 3 unsuccessfully login attempts.
- User passwords should be hashed before storage in the database.
- The password recovery and conference links are hard-to-guess URLs.
- The platform should implement token-based authentication.

## II. Performance

- Password recovery emails should be received in maximum 15 minutes after the request.
- The interview conference room should support a maximum of 20 participants at a time.

## III. Compatibility

- The platform should be compatible with the latest versions of the following browsers: Google Chrome, Mozilla Firefox and Microsoft Edge.

## IV. Usability

- The user interface should include clear and concise descriptions of the steps in the recruitment process.
- The platform should implement comprehensive error handling mechanisms, for a smooth user interaction.

## V. Design

- The design of the home page should be modern and include some dynamic elements, since the platform is mainly designed for young generations.
- For consistency purposes, all the pages of the platform should use a blue-based color scheme.
